SUMMARY

Middle Full Stack Developer specializing in Ruby on Rails with advanced experience in building real-time, scalable, and user-centric applications using modern Rails tooling including Hotwire, Turbo, and StimulusJS. Known for rapid delivery, clean architecture, and deep problem-solving across full-stack systems. Passionate about transforming complex ideas into polished, functional products.

SKILLS

- Backend Development Ruby on Rails, PostgreSQL, Redis, Sentry, Sidekiq
- Frontend Development Hotwire, Turbo, Stimulus, Tailwind CSS
- Testing RSpec, Minitest

EXPERIENCE

- **Ruby Full Stack Developer (Contractor)** The Tone (Remote, U.S. Client via Contractor Agreement)
April 2025 – Present
 - Trade Proposal System Designed and implemented a full trade engine including product selection, real-time preview, and role-based item tracking using polymorphic associations.
 - Stimulus-Powered UI Logic Created reusable StimulusJS controllers to support live item previews, toggle-all checkboxes, and responsive feedback.
 - Turbo Workflow Built multi-step trade flow using Turbo, Turbo Streams, and Rails forms for seamless UX and robust back-end logic.
 - Product Management Features Delivered full CRUD for user-owned products with Turbo Frames and dynamic validations.
 - Collaboration Worked directly with a U.S.-based team on Slack and GitHub, delivering high-impact features under an Independent Contractor Agreement.
 - Tech Stack Ruby on Rails, Hotwire (Turbo + StimulusJS), PostgreSQL, Tailwind CSS
- **Middle Ruby Full Stack Developer (Contractor)** ReelOn Technologies (Remote)
February 2025 – April 2025
 - Delivered 50+ production PRs in 1.5 months, including feature development, complex system enhancements, and bug resolution.
 - Built a flexible @mention system supporting 6+ entity types using polymorphic associations, regex parsing, and Stimulus-powered autocomplete.
 - Developed a diverse set of post types including audio, video, document, event-based, job-based, poll-based, and celebration posts.
 - Implemented post features like location tagging, hashtag extraction, preview rendering, and scheduled publishing with Turbo Streams.
 - Built a robust media handling system for uploading and previewing images, videos, audio files, and documents with iframe rendering.
 - Delivered the Post Scheduling feature with date/time selector, validation logic, and auto-publish functionality.
 - Implemented scalable nested comment tracking using Rails counter cache and a custom total count method on the Post model.
 - Mentored junior developers and collaborated closely with QA and product teams to ship high-quality releases.
 - Tech Stack: Ruby on Rails, Hotwire (Turbo + StimulusJS), Tailwind CSS, PostgreSQL
- **Ruby Full Stack Web Developer(Contractor)** Dependev (Remote)
January 2024 – June 2024
 - Avo Gem Development Enhanced the Avo admin panel to improve usability and efficiency for 250+ customers.
 - Feature Development Built advanced dashboard filters, improved search and authorization infrastructure.
 - Technical Support Provided customer support, troubleshooting, and bug fixes.

- Tech Stack Ruby on Rails, Hotwire, Avo gem

- **Ruby Full Stack Web Developer(Contractor)**

Duty Labs (Remote)

March 2023 - June 2023

- Booking Platform Developed a dynamic booking system with time zone conversion and content moderation.
- Notification System Implemented a robust notification system for user engagement.
- Tech Stack Ruby on Rails, Sidekiq, Pundit, ActiveAdmin, Redis

PERSONAL PROJECTS

- Near You Full Stack Web Application for Local Service Booking
 - Conceptualized, designed, and built a web app that connects users with local service providers.
 - **For Providers:** Service category selection, location-based services, hourly rate management, reviews, availability scheduling, and Stripe payments.
 - **For Users:** Appointment booking, Google Maps integration, notifications via noticed gem and mail, and profile management.
 - **Tech Stack:** Ruby on Rails, Tailwind CSS, PostgreSQL, Hotwire, Active Storage with AWS S3.

EDUCATION

- **Lucian Blaga University**

Romania

Bachelor's Degree in Computer Science

2021

LANGUAGES

- English Fluent
- Romanian Native
